Preface

The workshop on Computational Aspects of Nonmonotonic Reasoning is organized as one of the five special workshops at the Seventh International Workshop on Nonmonotonic Reasoning which is held in Trento, Italy, May 30–June 1, 1998 in conjunction with the Sixth International Conference on Principles of Knowledge Representation and Reasoning (KR'98).

The aim of the workshop is to bring together active researchers interested in computational aspects of nonmonotonic reasoning to discuss current research, results, application areas, and underlying theoretical issues. The workshop program consists of 10 papers accepted for presentation, a panel and system demonstrations.

We would like to express our warmest thanks to the other members of the Program Committee

Georg Gottlob
Antonis Kakas
Nicola Leone
Luis Moniz Pereira
Camilla Schwind
Mirek Truszczynski
Jia-Huai You

for their contribution in the review process and during the preparation of the workshop.

May 1998

Ilkka Niemelä and Torsten Schaub
Co-chairs of the Program Committee
