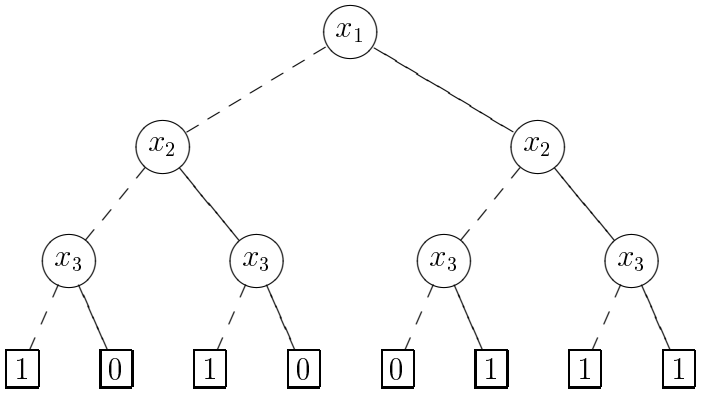
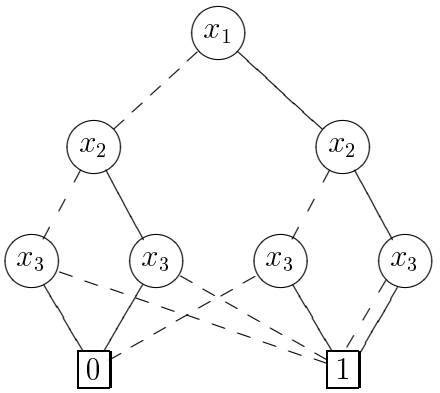
Logiikka tietotekniikassa: erityiskysymyksiä II
Laskuharjoitus 4
Ratkaisut

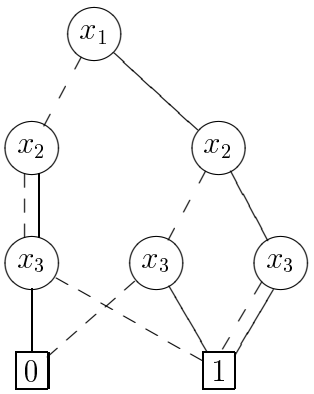
1. Valitaan järjestys $x_1 < x_2 < x_3$. Silloin OBDD on



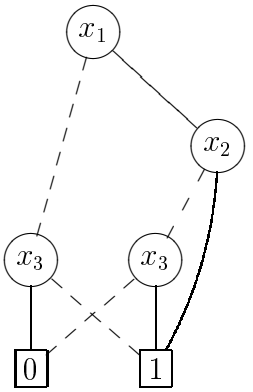
Poistetaan ylimääräiset terminaalit



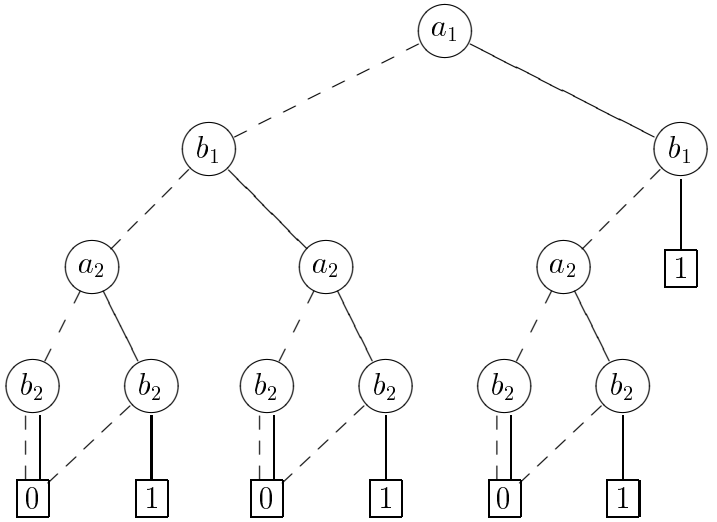
Poistetaan ylimääräiset ei-terminaalit



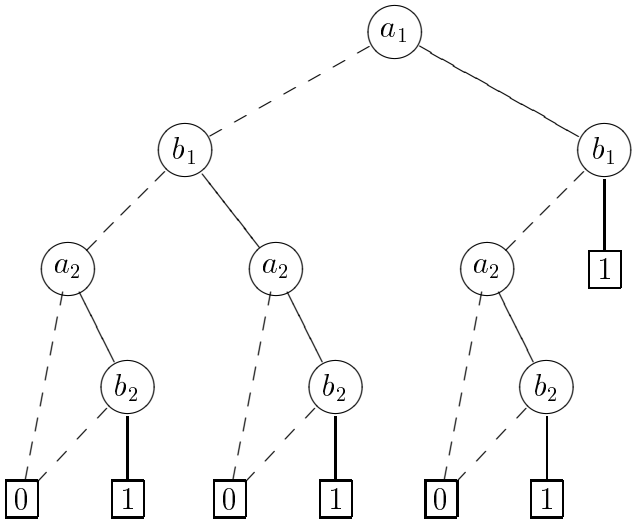
Poistetaan ylimääräiset testit



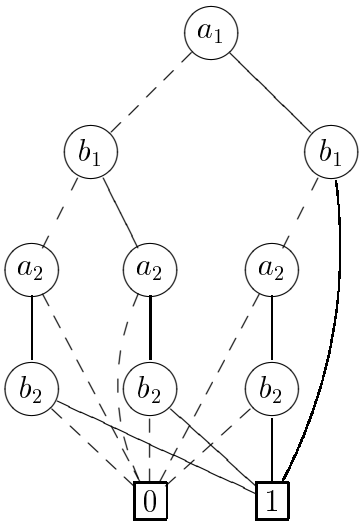
2. a) Järjestys $a_1 < b_1 < a_2 < b_2$



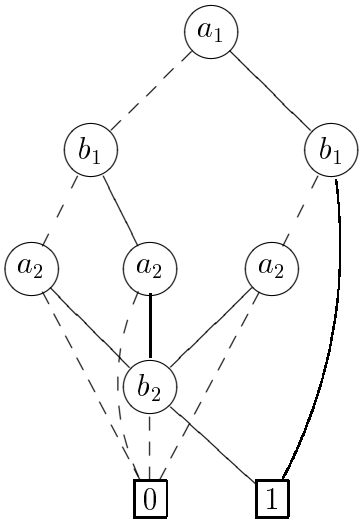
Poistetaan ylimääräiset testit



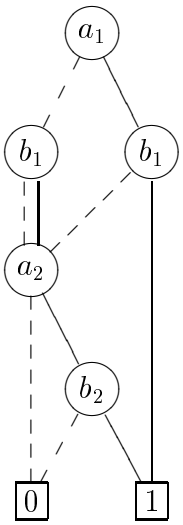
Poistetaan ylimääräiset terminaalit



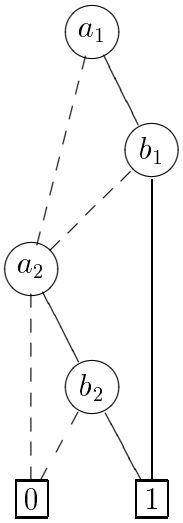
Poistetaan ylimääräiset ei-terminaalit



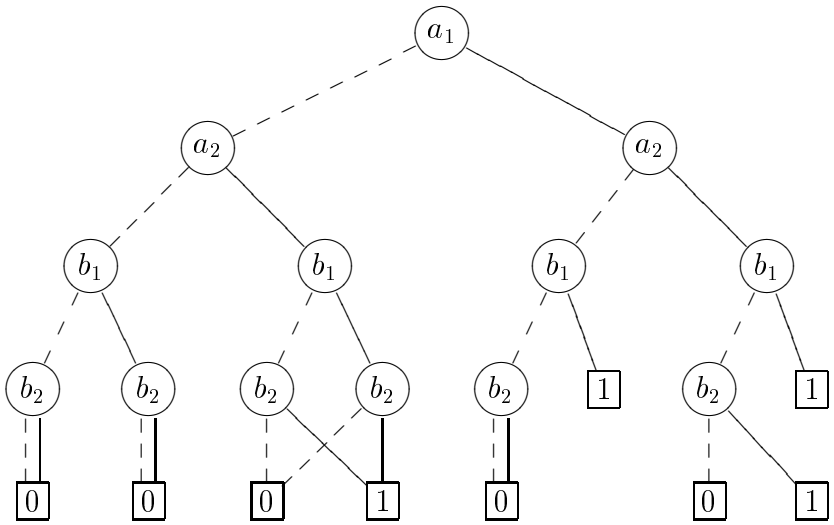
Poistetaan ylimääräiset ei-terminaalit



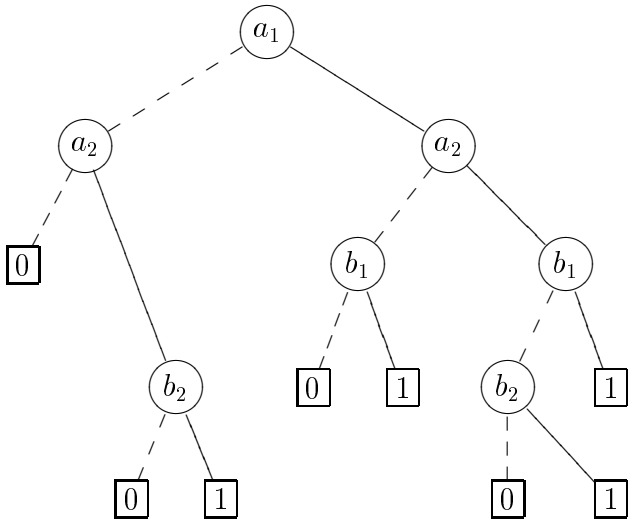
Poistetaan ylimääräiset testit



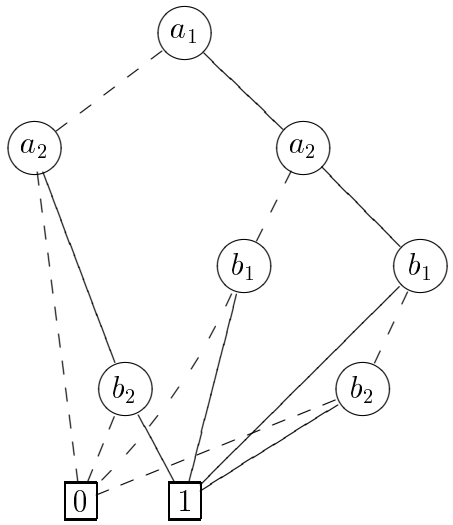
b) Järjestys $a_1 < a_2 < b_1 < b_2$



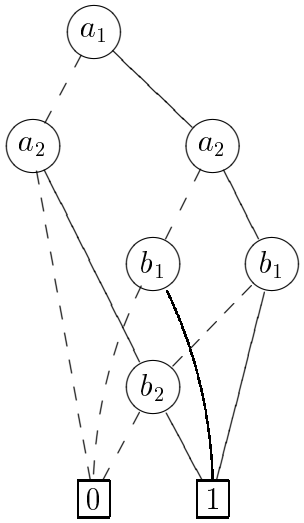
Poistetaan ylimääräiset testit ja ei-terminaalit



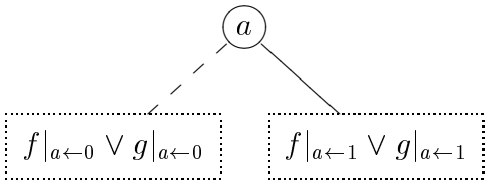
Poistetaan ylimääräiset terminaalit



Poistetaan ylimääräiset ei-terminaalit



3. Muuttujien järjestys on $a < b < c$. OBDD versio $f \vee g$:stä on tällöin

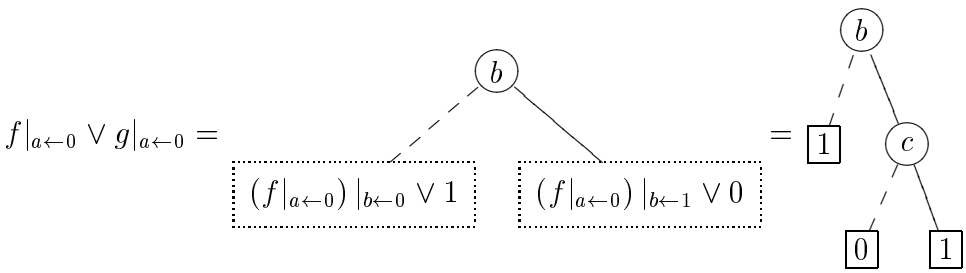


missä

$f|_{a\leftarrow 0} =$ 
, $g|_{a\leftarrow 0} =$ 
, $f|_{a\leftarrow 1} =$ 
ja

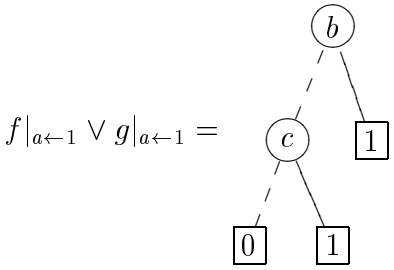
$$g|_{a\leftarrow 1} = \boxed{0}$$

Nyt



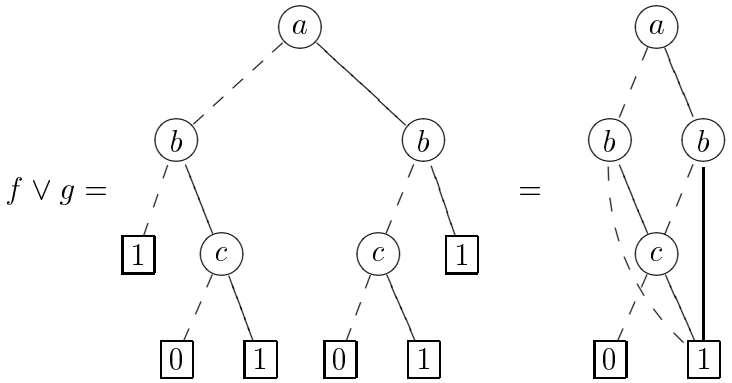
$f|_{a\leftarrow 0} \vee g|_{a\leftarrow 0} =$
b
$(f|_{a\leftarrow 0})\,|_{b\leftarrow 0} \vee 1$
$(f|_{a\leftarrow 0})\,|_{b\leftarrow 1} \vee 0$
=
b
1
c
0
1

ja



$f|_{a\leftarrow 1} \vee g|_{a\leftarrow 1} =$
b
c
1
0
1

Täten



$f \vee g =$
a
b
b
1
c
c
1
0
1
0
1
=
a
b
b
c
